

INDIVIDUALISED SOLUTIONS FOR THE CHEMICAL INDUSTRY

PALLETISING, PACKAGING, STORAGE AND DISPATCH OF SENSITIVE PRODUCTS WITHOUT DAMAGE

From conveying, loading and palletising to packaging technology and your warehouse management system, make sure that you rely on system solutions that are specially tailored to the needs of the chemical industry. As a world-leading manufacturer for intralogistics, the BEUMER Group offers solutions for efficient processes for handling all your sensitive chemical and petrochemical products.

Customer: A. Schulman GmbH

INDIVIDUALISED SOLUTIONS FOR THE CHEMICAL INDUSTRY

PALLETISING, PACKAGING, STORAGE AND DISPATCH OF SENSITIVE PRODUCTS WITHOUT DAMAGE

From conveying, loading and palletising to packaging technology and your warehouse management system, make sure that you rely on system solutions that are specially tailored to the needs of the chemical industry. As a world-leading manufacturer for intralogistics, the BEUMER Group offers solutions for efficient processes for handling all your sensitive chemical and petrochemical products.

SYSTEM SOLUTIONS

- › Bag and pallet conveying systems – for transporting chemical products without damage
- › High-performance palletising solutions – optimum stacking of PE bags
- › Stretch film packaging systems – weather-resistant, efficient and lasting protection for palletised load units
- › BEUMER warehouse management system – for optimum goods flow from the silo, through packaging to warehouse and dispatch

Customer: Clariant Produkte (Germany) GmbH

BEUMER GROUP – „MADE DIFFERENT“

For us, this means creating a long-term perspective based on top quality, sustainability and innovation. For over 75 years the BEUMER Group has been developing tailored system solutions throughout the world in the areas of conveying and loading technology, palletising and packaging technology, as well as sortation and distribution systems. Some 3,000 employees worldwide pool their many years of experience and their extensive knowledge about the different means of transport and requirements for goods in specific sectors, backed by a wide, well developed service network. This represents a solid foundation for exceptional, industry-specific solutions for the chemical industry and many other industrial sectors.

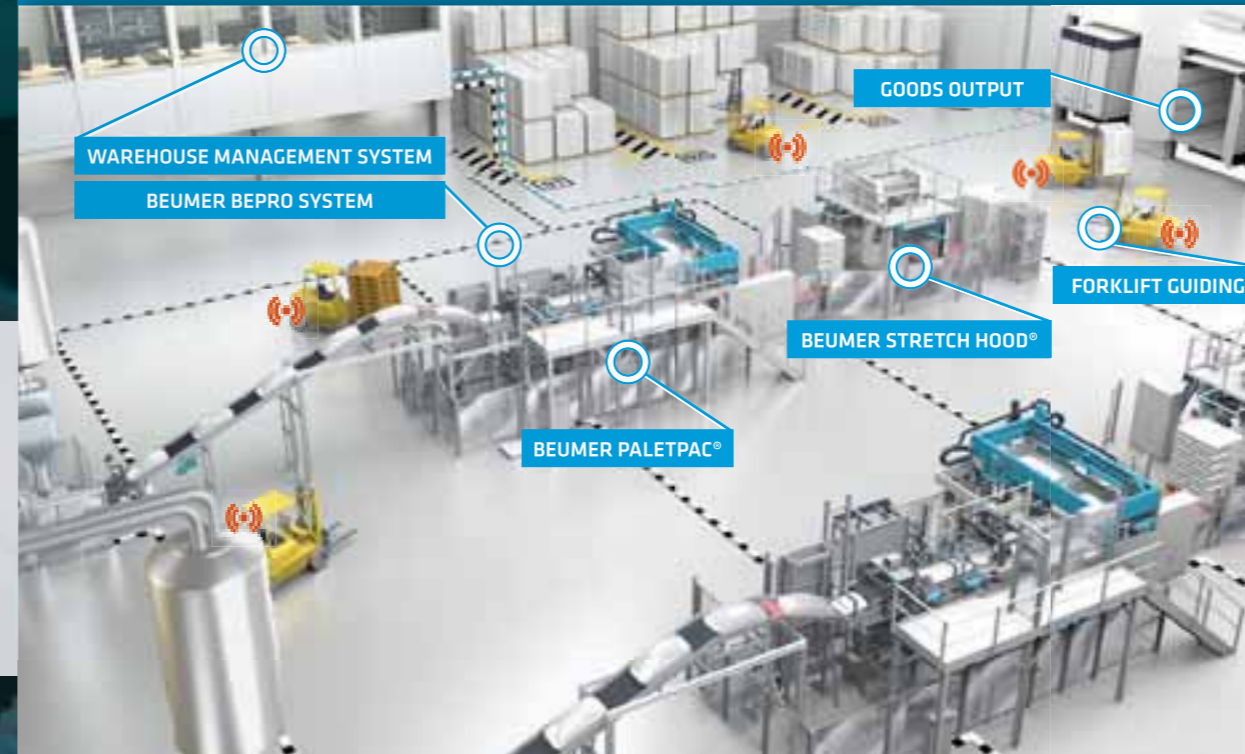

SPECIFIC SOLUTIONS FOR THE CHEMICAL INDUSTRY

Chemical products pose special demands for intralogistics solutions. The systems need to be resilient and tough, but they also have to handle sensitive goods carefully and gently. They face challenges in the form of high product temperatures, large volumes, heavy flow characteristics and smooth packaging materials with high coefficients of friction. The long-lasting system solutions of the BEUMER Group are optimally tailored to them and can be adapted flexibly. The BEUMER warehouse management system also increases the efficiency of all warehousing processes.

Products and technologies carrying BEUMER's "made different" seal are characterised by their sustainability, based on their economic, environmental, and social performance as measured by the BEUMER Sustainability Index (BSI).

THE CHEMISTRY IS RIGHT – FROM BAGGING TO DISPATCH

SYSTEM SOLUTIONS
